1. Project General Description

The goal of **Service Scout** is to provide a platform where users can easily search for and book qualified contractors to complete various jobs. The **Service Scout** app will also allow contractors to create detailed profiles that highlight their skills, services, and qualifications, making it easier for users to find the right professional based on their specific needs.

2. Product Features

The Service Scout application is designed to trivialize the process of searching for a handyperson with a desirable set of skills. Below are the cornerstone features and functions that encapsulate the spirit of the application:

Intuitive Search Function: Users can easily search for contractors based on the job they need completed. Whether it's an electrician, HVAC technician, or carpenter, **Service Scout** allows users to find professionals with the qualifications they are looking for.

Service Requesting: This feature enables smooth interaction between users and service providers. Users can request a service, and contractors can either accept and finish the request, ensuring efficient communication and scheduling.

Visibility and Exposure: **Service Scout** offers newly qualified contractors a platform to build their reputation by completing jobs, while established contractors can expand their client base and reach customers who might not have discovered them otherwise.

3. Functional Requirements

- FR0: The app will allow users to create a profile.
- FR1: The app will allow users to modify their profile.
- FR2: The app will allow users to search for a contractor.
- FR3: The app will allow users to request a service from a contractor.
- FR4: The app will allow users to write a review for a contractor.
- FR5: The app will allow providers to create a profile
- FR6: The app will allow providers to accept and finish services requested by a customer.
- FR7: The app will allow users and providers the ability to flag reviews and profiles
- FR8: The app will allow administrators to review and delete flagged reviews and profiles.
- FR9: Accounts will be protected by logins and passwords.
- FR10: Administrators will be assigned.

4. Non-Functional Requirements:

- NFR0: The app should load within 3 seconds on a normal internet connection.
- NFR1: The app should have a clear and simple interface that is easy to navigate and even complimentary to the eye to look at.
- NFR2: User accounts must be protected by secure logins.
- NFR3: The app should work on all web browsers.
- NFR4: The app should be usable for people with basic tech skills.

5. Scenarios

User: Gerrit Grevenstuk

Scenario: Looking for a Contractor

- **Initial Assumption:**
 - The user is logged in and on the main page.
- **Normal Flow:**
 - The system displays contractors in the area.
 - The user can view profiles of contractors.
- **What Can Go Wrong:**
 - No results are found.
 - Solution: The system suggests modifying the search.
- **System State on Completion:**
 - The user sees a list of contractors based on what is loaded on the main page.

User: Gerrit Grevenstuk

Scenario: Request a Service

- **Initial Assumption:**
 - The user is logged in, has searched for a contractor, and has selected one.
- **Normal Flow:**
 - The user clicks "Request a Service."
 - The system will prompt the user to input work that needs to be done.
 - The system confirms the request is sent.
- **What Can Go Wrong:**
 - The user selects the wrong provider.
 - Solution: The user can cancel the request before submitting.
- **System State on Completion:**
 - The service request is sent, and the user is redirected to the home page.

User: Gerrit Grevenstuk

Scenario: Create a Profile

- **Initial Assumption:**
 - The user is on the homepage and has not yet created an account.
- **Normal Flow:**
 - The user clicks "Create Account"
 - The system presents a form to enter details (e.g., name, email, password).
 - The user fills in the form and clicks "Create Account"
 - The system creates the profile and logs the user in.
- **What Can Go Wrong:**
 - The user enters invalid details (e.g., wrong email format).
 - Solution: The system prompts the user to correct the details.
- **System State on Completion:**
 - The user's profile is created, and they are logged in.

User: Gerrit Grevenstuk

Scenario: Write a Review for a Contractor

- **Initial Assumption:**
 - The user has hired a contractor through the platform.
- **Normal Flow:**
 - The user goes to their provider's page and clicks "Leave a Review."
 - The system displays a form for the user to provide a rating and feedback.
 - The user submits the review.
- **What Can Go Wrong:**
 - The user leaves the rating blank.
 - Solution: The system prompts the user to fill in the rating.
- **System State on Completion:**
 - The review is submitted and visible on the contractor's profile

User: Gerrit Grevenstuk

Scenario: Flag Inappropriate Comments or Profiles

- **Initial Assumption:**
 - The user encounters a comment or profile they wish to report.
- **Normal Flow:**
 - The user clicks "Flag" next to the comment or profile.
 - The system asks the user to choose a reason for the flag.
 - The user submits the flag, and the system confirms the report is sent.
- **What Can Go Wrong:**
 - The user flags by mistake.
 - Solution: The system allows the user to undo the action.
- **System State on Completion:**
 - The flagged content is reported, and the user stays on the same page.

Contractor: Dalton Blume

Scenario: Create a profile

- **Initial Assumption:**
 - The contractor is on the home page and has not yet created an account.
- **Normal Flow:**
 - The contractor clicks "Create Account"
 - The system presents a form to enter details (e.g., name, email, password, address, etc.)
 - The contractor fills in the form and clicks "Create Account"
 - The system creates the contractor's profile and logs them in
- **What Can Go Wrong:**
 - The contractor enters invalid details (e.g., wrong email format).
 - Solution: The system prompts the contractor to correct the required field.
- **System State on Completion:**
 - The contractor's profile is created, and they are logged in.

Contractor: Dalton Blume

Scenario: Accept/Reject/Finish Services

- **Initial Assumption:**
 - The contractor is logged in and has received service requests from clients.
- **Normal Flow:**
 - The contractor navigates to "Service Requests."
 - The system displays a list of pending requests.
 - The contractor clicks "Accept" for a specific request, prompting a confirmation.
 - Upon confirmation, the system updates the request status to "Accepted."
 - Once the service is completed, the contractor clicks "Completed"
- **What Can Go Wrong:**
 - The contractor accidentally rejected a request they wanted to accept.
 - Solution: The contractor can just go back and click the dropdown box to change the request from reject to accept.
- **System State on Completion:**
 - The service request status is updated appropriately, reflecting the actions taken by the contractor.

Contractor: Dalton Blume

Scenario: Review Customer Reviews

- **Initial Assumption:**
 - The contractor is logged in and has completed services for clients
- **Normal Flow:**
 - The contractor navigates to the "Reviews" section from their profile.
 - The system displays a list of feedback received from clients for completed services, including ratings and comments.
 - The contractor clicks on a specific review to view details.
 - The system shows the full text of the review along with the rating and service details.
 - The contractor can respond to the review or report it if necessary.
- **What Can Go Wrong:**
 - The contractor notices an inappropriate or unfair review.
 - **Solution:** The contractor can click "Report" next to the review, prompting a confirmation for the contractor, asking for the reason for reporting. The system then submits the report for moderation.
- **System State on Completion:**
 - The contractor can see all received reviews, their overall rating is updated, and any reported reviews are flagged for admin attention while remaining visible in the list.

SysAdmin: Gerrit Grevenstuk/Dalton Blume

Scenario: View and Delete Flagged Accounts

- **Initial Assumption:**
 - The SysAdmin is logged into the admin dashboard.
- **Normal Flow:**
 - The SysAdmin navigates to the "Flagged Accounts" section.
 - The system displays a list of flagged accounts with basic details (e.g., username, reason for flagging).
 - The SysAdmin selects an account to review.
 - After reviewing the account, the SysAdmin clicks the "Delete" button to remove it.
 - The system asks for confirmation.
 - The SysAdmin confirms, and the system deletes the account.
- **What Can Go Wrong:**
 - The SysAdmin deletes the wrong account.
 - Solution: The system allows a short undo window.
- **System State on Completion:**
 - The account is deleted, and the SysAdmin remains on the list of flagged accounts.

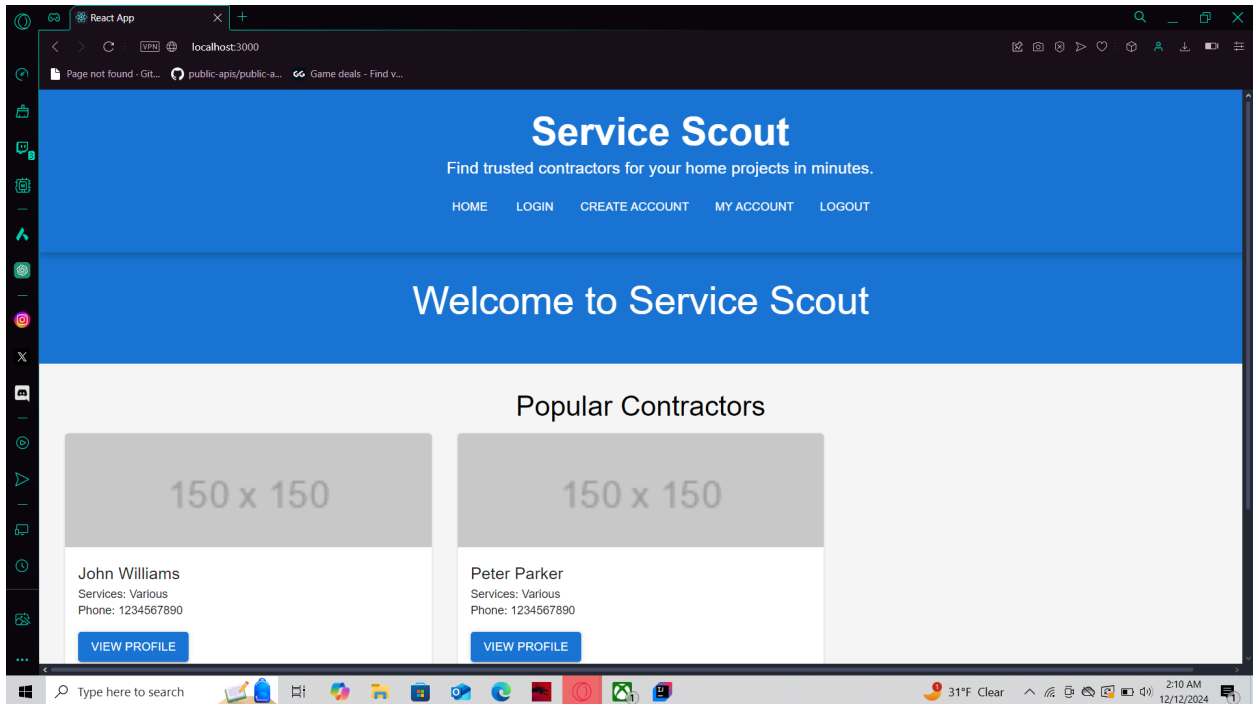

SysAdmin: Gerrit Grevenstuk/Dalton Blume

Scenario: View and Delete Flagged Comments

- **Initial Assumption:**
 - The SysAdmin is logged into the admin dashboard.
- **Normal Flow:**
 - The SysAdmin navigates to the "Flagged Comments" section.
 - The system displays a list of flagged comments, including the comment text and the reason it was flagged.
 - The SysAdmin selects a flagged comment for review.
 - After reviewing the comment, the SysAdmin clicks the "Delete" button to remove it.
 - The system asks for confirmation.
 - The SysAdmin confirms the deletion, and the system removes the comment.
- **What Can Go Wrong:**
 - The SysAdmin accidentally deletes the wrong comment.
 - Solution: The system provides a short window to undo the action.
- **System State on Completion:**
 - The comment is deleted, and the SysAdmin remains on the list of flagged comments.

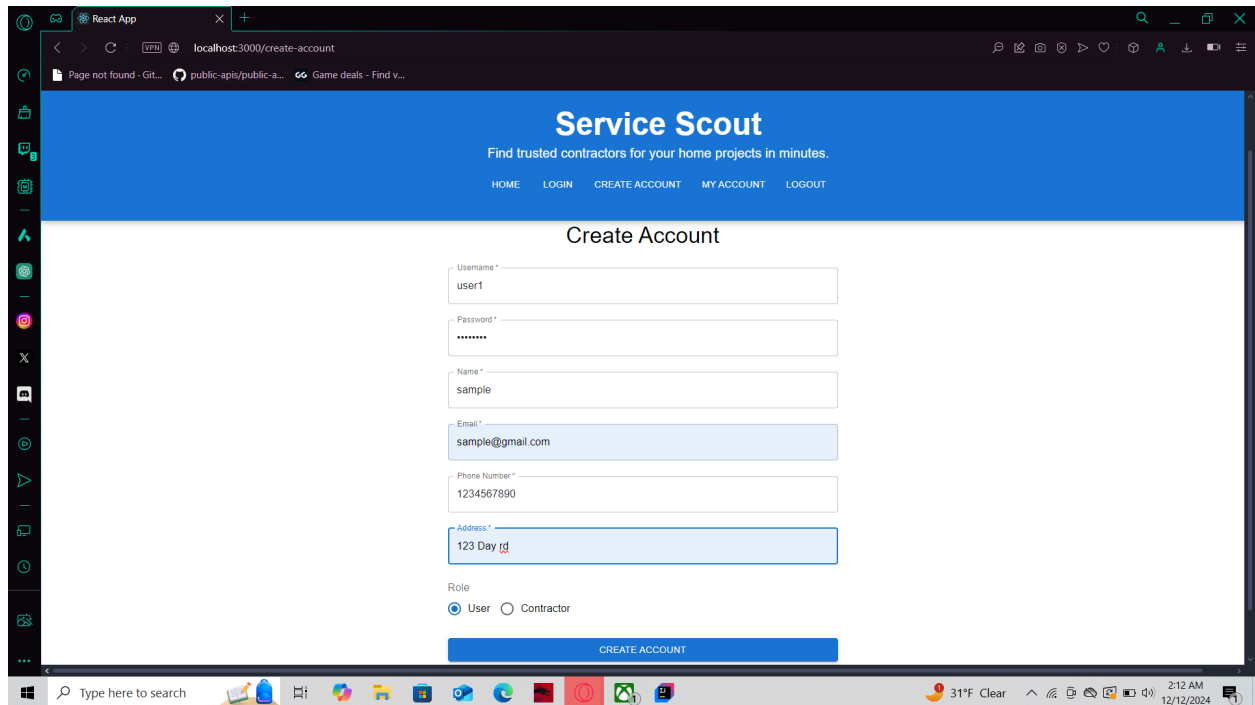

6. Scenarios with Screenshots

Homepage

This will be the first thing anyone will see when opening Service Scout

Create User Account

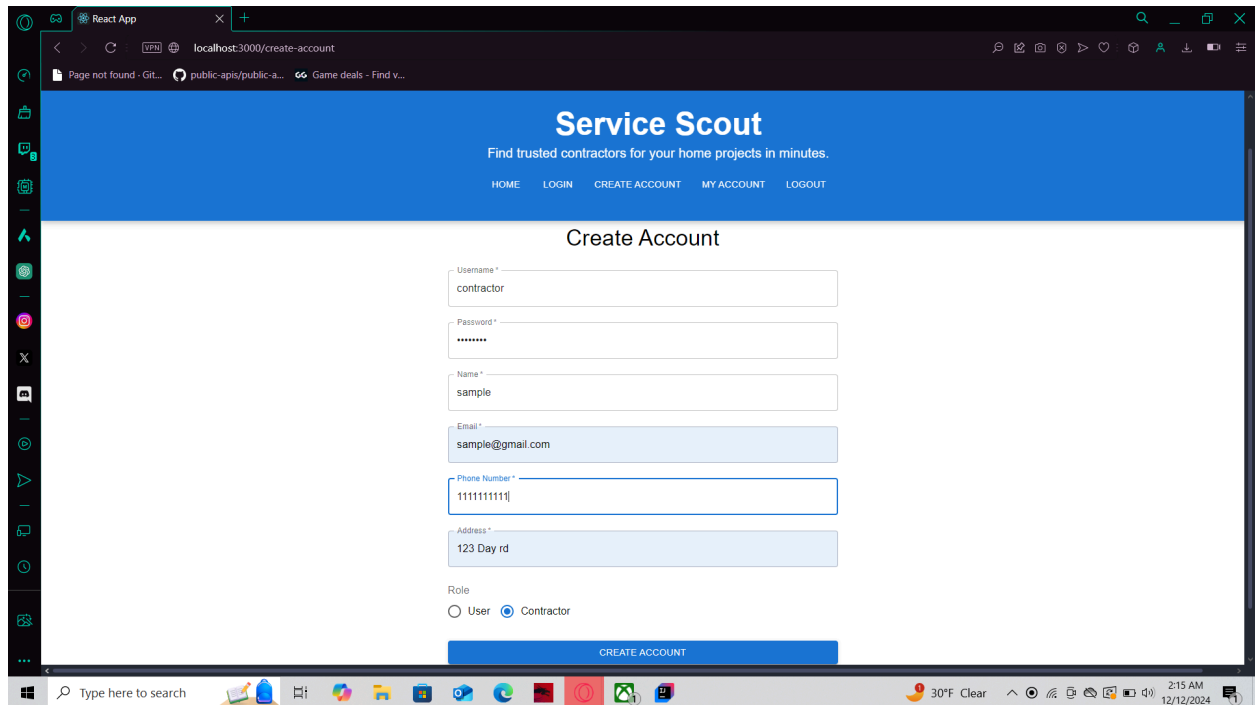

The screenshot shows a web browser window with the URL `localhost:3000/create-account`. The page has a blue header with the text "Service Scout" and "Find trusted contractors for your home projects in minutes." Below the header is a navigation bar with links: HOME, LOGIN, CREATE ACCOUNT, MY ACCOUNT, and LOGOUT. The main content area is titled "Create Account" and contains a form with the following fields:

- Username*:
- Password*:
- Name*:
- Email*:
- Phone Number*:
- Address*:

Below the form fields is a "Role" section with two radio buttons: ☒ User and ☐ Contractor. At the bottom of the form is a blue button labeled "CREATE ACCOUNT".

This is what the user will see when they are creating their user account. They will input all of their information and select "User" and then "Create Account".

Creating a Contractor Account

The screenshot shows a web browser window displaying the 'Service Scout' 'Create Account' page. The browser's address bar shows 'localhost:3000/create-account'. The page has a blue header with the 'Service Scout' logo and the tagline 'Find trusted contractors for your home projects in minutes.' Below the header is a navigation bar with links: HOME, LOGIN, CREATE ACCOUNT, MY ACCOUNT, and LOGOUT. The main content area is titled 'Create Account' and contains a form with the following fields: Username (filled with 'contractor'), Password (filled with '*****'), Name (filled with 'sample'), Email (filled with 'sample@gmail.com'), Phone Number (filled with '1111111111'), and Address (filled with '123 Day rd'). Below these fields is a 'Role' section with two radio buttons: 'User' and 'Contractor' (which is selected). At the bottom of the form is a blue button labeled 'CREATE ACCOUNT'. The browser's taskbar at the bottom shows various application icons and the system clock indicating 2:15 AM on 12/12/2024.

Service Scout
Find trusted contractors for your home projects in minutes.

Role
☐ User ☒ Contractor

CREATE ACCOUNT

This is what the contractor will see when they are creating their contractor account. They will input all of their information and click “Contractor” and “Create Account”.

Editing User Account

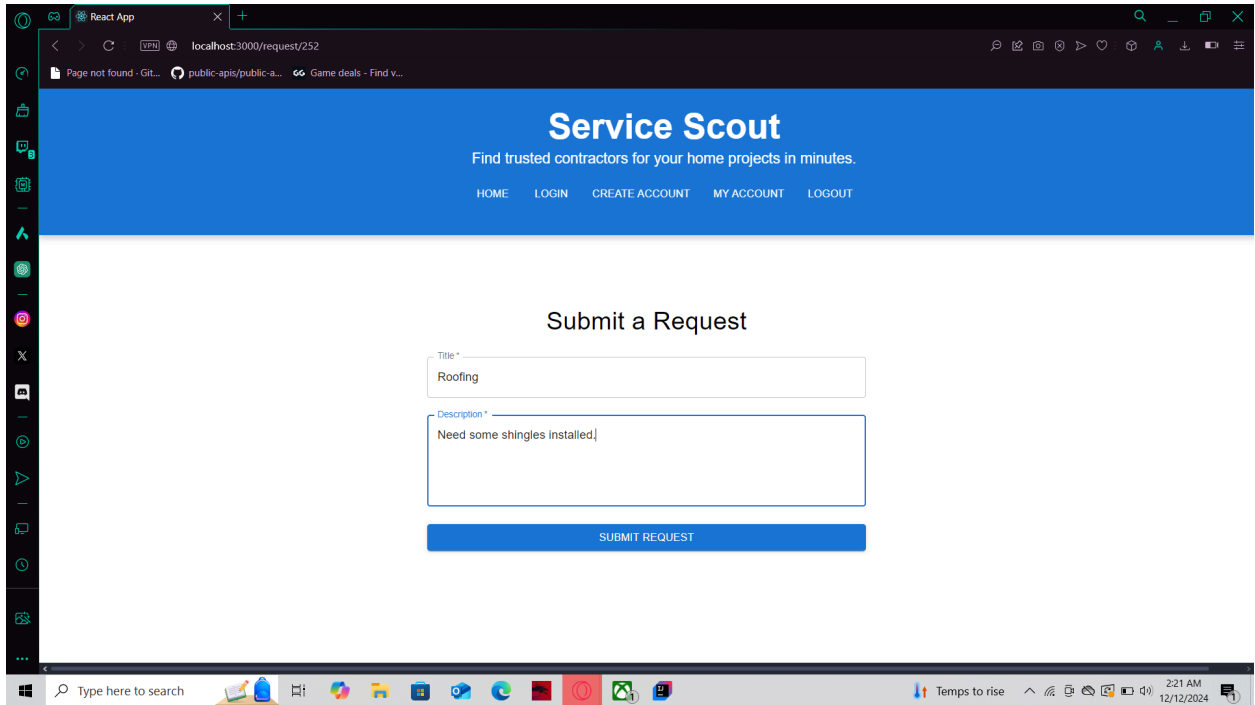

The screenshot shows a web browser window displaying the 'Service Scout' application. The browser's address bar shows 'localhost:3000/edit-account'. The application's header is blue with the text 'Service Scout' and the tagline 'Find trusted contractors for your home projects in minutes.' Below the header is a navigation bar with links: HOME, LOGIN, CREATE ACCOUNT, MY ACCOUNT, and LOGOUT. The main content area contains a form for editing a user account. The form has the following fields:

- Username *: user
- Password *: masked with dots
- Name *: user
- Email *: user@sample.com
- Phone Number *: 3333333333
- Address *: 123 Address Rd

At the bottom of the form are two buttons: 'UPDATE ACCOUNT' (blue) and 'CANCEL' (white with a blue border).

This is what a regular user will see when they want to edit their account. They will be able to edit any field and then click “Update Account”, which will change their account information to what they typed in those fields.

Requesting Service from Contractor

The screenshot displays a web browser window with the URL `localhost:3000/request/252`. The page features a blue header with the text "Service Scout" and the tagline "Find trusted contractors for your home projects in minutes." Below the header is a navigation menu with links: HOME, LOGIN, CREATE ACCOUNT, MY ACCOUNT, and LOGOUT. The main content area is titled "Submit a Request" and contains a form with two input fields: "Title *" with the value "Roofing" and "Description *" with the value "Need some shingles installed.". A blue "SUBMIT REQUEST" button is positioned below the form. The browser's taskbar at the bottom shows the Windows search bar, various application icons, and the system clock indicating 2:21 AM on 12/12/2024.

Find trusted contractors for your home projects in minutes.

HOME LOGIN CREATE ACCOUNT MY ACCOUNT LOGOUT

Submit a Request

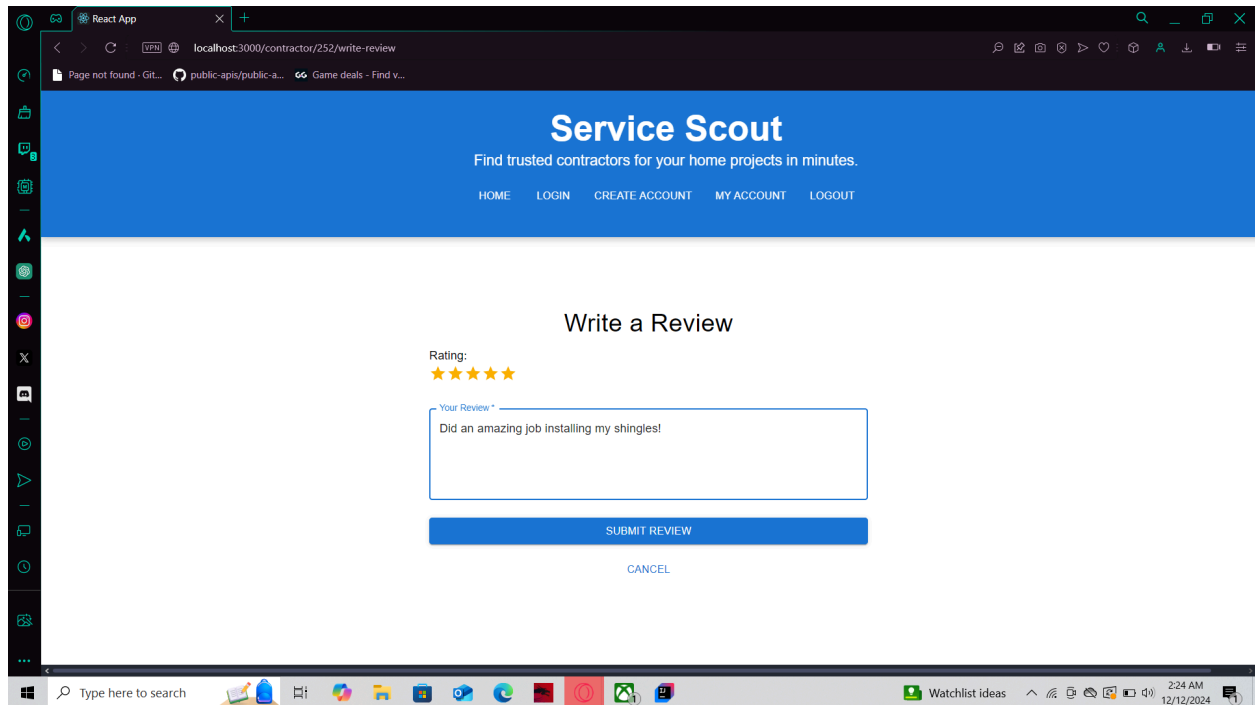

Title *
Roofing

Description *
Need some shingles installed.

SUBMIT REQUEST

Once the user selects the contractor they want to do their job, they will select the contractor's profile and then select Request Service. Directing them to this page for them to insert their request information.

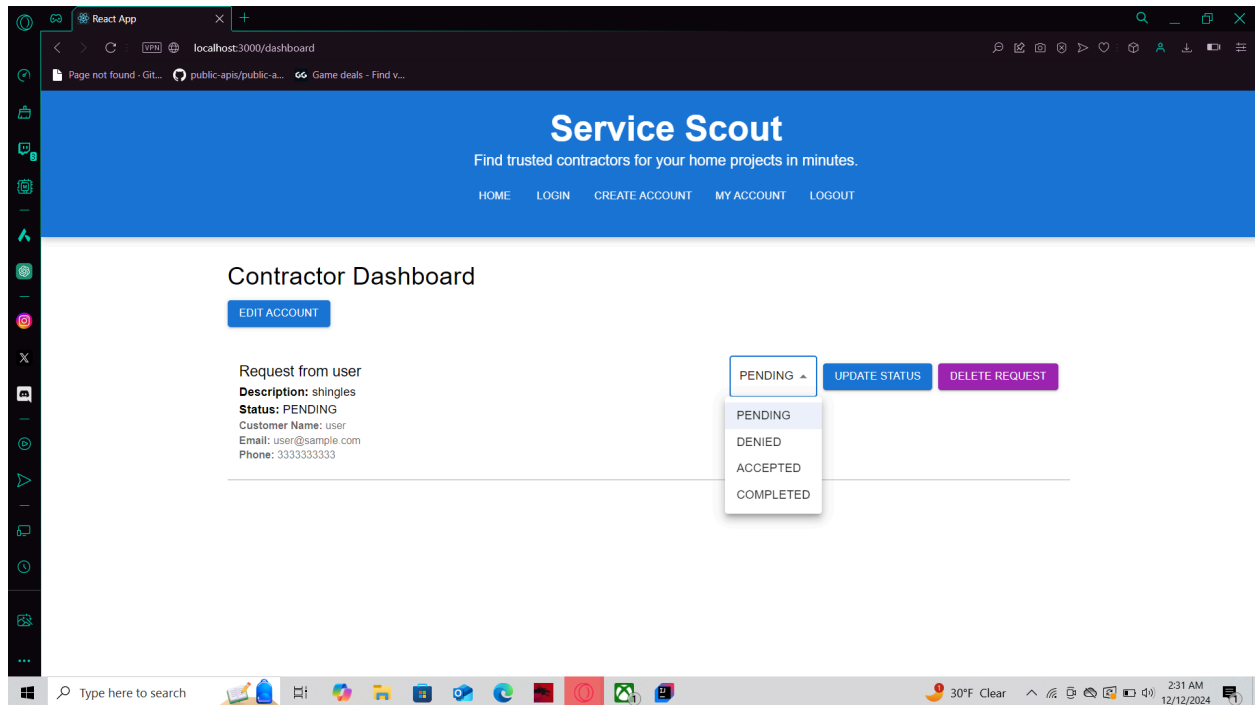

Leaving a Contractor a Review

The screenshot shows a web browser window with the URL `localhost:3000/contractor/252/write-review`. The page has a blue header with the "Service Scout" logo and the tagline "Find trusted contractors for your home projects in minutes." Below the header is a navigation bar with links: HOME, LOGIN, CREATE ACCOUNT, MY ACCOUNT, and LOGOUT. The main content area is titled "Write a Review". It features a "Rating:" section with five yellow stars, where the first four are filled. Below the stars is a text input field with the placeholder "Your Review" and the text "Did an amazing job installing my shingles!". At the bottom of the form are two buttons: "SUBMIT REVIEW" (blue) and "CANCEL" (light blue).

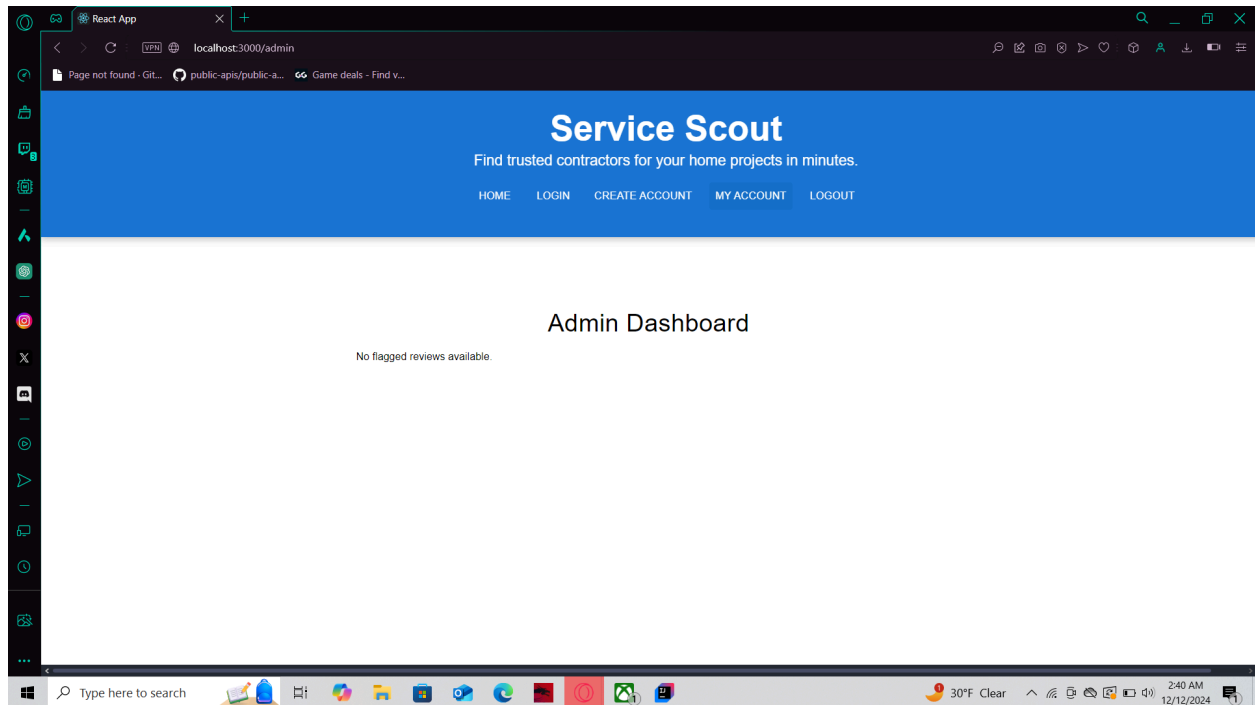

The user can leave their contractor a review by going to their contractor's profile and selecting "Leave a Review". Which will direct them to this page to leave a rating and a comment.

Accepting/Denying a Request as a Contractor

This is what the contractor will see when they navigate to their account. They will see their requests that are pending for them to approve, deny, or delete them. The contractor will select whichever option and then click “UPDATE STATUS”. This will update the status of the request from the user to let them know what that status is.

Admin viewing flagged Reviews

When the admin is logged in and goes to “MY ACCOUNT”, this is where they will be able to go over the flagged reviews and delete/approve them.
